

# THINKING OUTSIDE THE BOXCAR.

Innovation and ingenuity have been at the core of Union Pacific since Abraham Lincoln directed the company to connect the nation, east to west. Today is no different. That's why our GPS-equipped refrigerated boxcars not only tell our shippers the exact location of their produce, but also alert us of even a two-degree variance in the temperature of the cargo. Just another way we are expanding our services for our customers by expanding our thinking.
