## Sail 2 Rail

BUILDING AMERICA®

# Sail 2 Rail

At Union Pacific, we know the automotive market. We ship three out of every four vehicles delivered in the Western U.S. — more than six million vehicles every year. With access to 11 Pacific Coast ports and 38 vehicle distribution centers across our network — we can deliver your **Vehicles to Market**.

We serve the key U.S. growth markets, have access to the eastern railroads and connect to Canada and Mexico — all of which assist in delivering your **Vehicles to Market** — more than 99 percent damage-free and on time.

Once your automobiles arrive at one of our Pacific Coast ports, they will be expedited onto a multi-level rail car. Union Pacific's multi-level fleet is the largest in the rail industry. Additionally we have the expertise to coordinate truck service from one of our vehicle distribution facilities to the local dealer. During transit, you will have complete vehicle visibility with our web-enabled tracking technology.

Call us at 800-877-0513 to learn more about our extensive automotive network. We look forward to delivering your **Vehicles to Market**.
